

Help to Fight COVID-19

Use CyberMed Telehealth For Free

Care for your patients without running into risk

CyberMed Telemedicine (CDOC) is a platform that is HIPAA compliant and is very easy to operate. It is compatible with most of the commonly used web browsers, and mobile OS's such as IOS and Android. The export visit report can be imported to most of the existing EHRs, such as MDland and ECW.

To help fight COVID-19, we are providing the service for all interested providers, free of charge. We will assist the enrolled providers for billing guidelines and data transfers as necessary. For more details, please visit our web site www.cybermedcorp.com
